***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 47 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the "treatment" of some of the diseases, does not reasonably provide enablement for "treatment" of all diseases covered under this mechanism, far less the "prevention" thereof. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. \*\*\*

The state of the art for the majority of drugs are treatment, very rare is there prevention involved, without evidence to the contrary. Furthermore, applicant has not sufficiently enabled all the possible diseases that could be covered under such a broad, sweeping mechanism claims. The office has a push on quality where these type of mechanism claims are frowned upon. They claim that they are reach-through claims.

It is suggested that one way to overcome this problem is to remove the word "preventing" and to also limit the number of diseases in Markush language to the ones actually contemplated and/or enabled.

Furthermore, the word "including" is indefinite and therefore impermissible claim language because it may or may not imply exclusion or does not state all that is included.

Art Unit: 1626

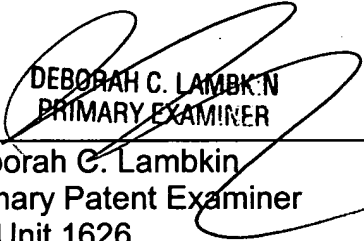

Removal of this word and Markush language is suggested to overcome this problem.

***Allowable Subject Matter***

Claims 1-46 and 48 are allowed over the prior art of record.
